OMC MLM ENTERPRISE SYSTEM

STEP-BY-STEP FTP DEPLOYMENT & DATABASE SETUP GUIDE

Version 2.0 | Multi-Language (TH, EN, LO) | Production Ready

This comprehensive guide walks you through uploading the OMC MLM System to your web hosting server via FTP (cPanel / DirectAdmin / Plesk / VPS) and setting up the MySQL database.
Files included: Production static build, .htaccess, MySQL database script, and JSON data exports.

1. PACKAGE CONTENTS & FILES OVERVIEW

[FILE] omc_mlm_ftp_dist.zip	Production ready website files (drop directly into public_html)
[FILE] .htaccess	Apache SPA rewrite rules (prevents 404 on page refresh) + GZIP cache
[FILE] omc_mlm_database.sql	Complete MySQL database schema + initial seed data + supported banks
[FILE] database_export.json	Full structured database export in JSON format
[FILE] db_connect.php	Ready-to-use PHP PDO database connection helper
[FILE] server.js	Optional Node.js Express server script (for VPS / Node.js hosting)

2. FTP CLIENT SETUP (FileZilla / Cyberduck / WinSCP)

Step 2.1: Open FileZilla Client (or your preferred FTP client).

Step 2.2: Go to File > Site Manager > New Site.

Step 2.3: Host: Enter your server domain or IP address (e.g., ftp.yourdomain.com).

Step 2.4: Protocol: Select "FTP - File Transfer Protocol" (or SFTP if using SSH key).

Step 2.5: Encryption: Select "Use explicit FTP over TLS if available" or "Plain FTP".

Step 2.6: Logon Type: Select "Normal" and input your FTP Username and Password.

Step 2.7: Transfer Settings: Set Transfer mode to "Passive". Port: 21 (or 22 for SFTP).

Step 2.8: Click "Connect" and verify you are connected to the remote server directory tree.

3. UPLOADING WEBSITE TO YOUR WEB SERVER (public_html)

Option A (Via FTP Client):

1. Unzip "omc_mlm_ftp_dist.zip" on your local computer.
2. In FileZilla, navigate to remote directory "/public_html" (or "/www" or your subdomain root).
3. Select all extracted files (index.html, assets folder, .htaccess) and drag them into public_html.
4. Ensure ".htaccess" is uploaded (make sure hidden files are visible in FileZilla: Server > Force showing hidden files).

Option B (Via cPanel File Manager - Fastest Method):

1. Log in to your cPanel hosting account.
2. Open "File Manager" and navigate to "public_html".
3. Click "Upload" and choose "omc_mlm_ftp_dist.zip".
4. Right click the uploaded zip file and click "Extract".

5. Verify "index.html" is in the root of public_html.

4. MYSQL DATABASE CREATION & IMPORT VIA phpMyAdmin

Step 4.1: In cPanel, click "MySQL Database Wizard" or "MySQL Databases".

Step 4.2: Create a new database (e.g., "youruser_omcmlm").

Step 4.3: Create a database user and assign a strong password.

Step 4.4: Add the user to the database and grant "ALL PRIVILEGES".

Step 4.5: Return to cPanel home and open "phpMyAdmin".

Step 4.6: Click your newly created database in the left sidebar.

Step 4.7: Click the "Import" tab at the top menu.

Step 4.8: Click "Choose File" and select "omc_mlm_database.sql".

Step 4.9: Ensure Character set is "utf8mb4" and click "Go" or "Import".

Step 4.10: You will see green success messages: 9 tables and initial seed data created successfully!

5. APACHE .htaccess & PREVENTING 404 NOT FOUND ERRORS

Because this application is a modern Single Page Application (SPA), all routes (e.g. /dashboard, /genealogy, /admin) are handled client-side by JavaScript. Without URL rewrite, refreshing a subpage on Apache will cause a "404 Not Found" error.

The included ".htaccess" file solves this completely by routing all requests to "index.html":

```
RewriteEngine On
RewriteCond %{REQUEST_FILENAME} !-f
RewriteCond %{REQUEST_FILENAME} !-d
RewriteRule . /index.html [L]
```

Note: Ensure your web server has "mod_rewrite" enabled (standard on 99% of cPanel and Apache servers).

6. DEFAULT TEST ACCOUNTS & SYSTEM ACCESS

Primary Member:	Code: TH889214 | Kittisak (Diamond) | PIN: 123456
Alternative Member 2:	Code: TH889502 | Natcha (Gold) | PIN: 123456
Alternative Member 3:	Code: TH890118 | Thanakorn (Platinum) | PIN: 123456
Admin Console:	Switch to Admin via user menu or Admin Mode button

SUPPORT & VERIFICATION

Your OMC MLM System includes Thai, English, and Lao language support + Lao bank integration.
Need assistance? Upload this PDF to your server administrator or technical hosting support.
